

Jordan

**Occupational Therapist
QLD**

Jordan is an occupational therapist passionate about supporting children with autism and older adults to live more independently through practical, person-centred care and assistive technology.

Jordan is an occupational therapist dedicated to helping people build independence and improve their quality of life across paediatric, adult and aged care settings. She completed her Bachelor of Occupational Therapy in 2025 and brings a practical, client-centred approach to her work.

Jordan previously worked as an Allied Health Assistant and completed a 10-week capacity-building project in dementia care, supporting staff to enhance residents' autonomy. Her clinical placements included community paediatrics, stroke rehabilitation at the Royal Hobart Hospital, aged care rehabilitation at Kallangur Satellite Hospital, and cardiology ward observation at The Prince Charles Hospital.

She has a strong interest in supporting children with autism and mental health needs, as well as helping older adults maintain independence through assistive technology and functional living strategies.
