

Molly

**Speech Pathologist
QLD**

Molly is a speech pathologist passionate about paediatric communication and adult swallowing, language and voice therapy, with experience supporting clients across schools and community settings.

Molly is a speech pathologist who works with clients across the lifespan, supporting communication and swallowing needs in both paediatric and adult populations. She completed her Bachelor of Speech Pathology in 2025.

Molly gained experience across a wide range of settings including paediatric private practice, a student-led adult outpatient clinic, a community-based service and a primary school environment. These placements allowed her to develop skills in paediatric and adult speech and language therapy, augmentative and alternative communication (AAC), swallowing (dysphagia) management and voice therapy.

Molly has a particular passion for paediatric speech and language development, as well as supporting adults with language, swallowing and voice challenges.
