

# Nick

**Speech Pathologist  
QLD**

**Nick is a speech pathologist with a special interest in adult voice and swallowing disorders and paediatric communication, helping clients of all ages build confident, functional communication skills.**

Nick is a speech pathologist who works with both adults and children, supporting communication, voice and swallowing needs across a variety of clinical areas. He graduated with a Bachelor of Speech Pathology (First Class Honours) in 2025 and is passionate about delivering practical, evidence-based therapy tailored to each person's goals.

Nick has experience working with adults with voice and upper airway conditions, including chronic cough and inducible laryngeal obstruction, as well as individuals with communication changes related to neurological conditions such as mild dementia. He also has experience in dysphagia assessment and management, supporting safe and effective swallowing.

In paediatrics, Nick has worked with children aged 2–15 years across speech, language, literacy and social communication goals.
