

Brianna

**Occupational Therapist
QLD**

Brianna brings a grounded, family-focused approach to therapy, helping clients gain independence while staying active and engaged in the activities they love.

Brianna is dedicated to helping clients achieve comfort, independence, and meaningful daily living. She specialises in assistive technology assessments, pressure care management, postural support, and capacity-building therapy for children and adults. Brianna is particularly passionate about supporting older adults to stay safe and independent at home, as well as helping children and families develop strategies for emotional regulation and daily life skills.

Her hands-on, family-focused approach prioritises trust, clear routines, and practical solutions that make therapy effective and sustainable. Brianna is motivated by the tangible difference occupational therapy can make, from improving sleep and comfort for older adults to supporting children's transitions and development.

Clinical Special Interests:

- Assistive technology assessments (scooters, recliners, wheelchairs)
- Pressure care management and postural support
- Capacity-building therapy for children and adults
- Family-centred strategies for emotional regulation and daily life skills
- Supporting older adults to remain safe, comfortable, and independent at home

Personal Interests:

- Karate
- Golf
- Watching and supporting sports (Blues, Australian cricket)
