

Freya

**Regional Clinical Supervisor
Speech Pathologist
QLD**

Freya is a Speech Pathologist specialising in high-tech AAC and early language development, delivering practical, client-centred therapy to support meaningful communication across all ages.

Freya is a Speech Pathologist passionate about supporting children and adults to develop confident, functional communication. With experience across early language development and complex communication needs, she has a strong clinical focus on high-tech AAC for clients with neurodegenerative conditions. Freya delivers client-centred, collaborative therapy in community settings, ensuring assessments and interventions are practical, meaningful, and tailored to everyday life.

She is committed to ongoing professional development and has completed additional training in Childhood Apraxia of Speech, Rapid Syllable Transition Training (ReST), paediatric feeding, colourful semantics, AAC, and Developmental Language Disorder (DLD). Freya values building trusting relationships with clients and families to empower participation, independence, and progression toward individual communication goals.
