

Georgia

**Occupational Therapist
QLD**

Meet Georgia, an OT who loves supporting children to develop essential skills and helping adults recover independence after injury or illness.

Georgia is an Occupational Therapist, she has gained experience across a variety of clinical settings, including stroke and neurological rehabilitation, paediatric therapy, and orthopaedic hospital wards.

During her placements, Georgia has supported clients to regain function, independence, and confidence in daily activities. She has experience with upper-limb and hand rehabilitation, fine and gross motor development in children, and ensuring safe discharge and functional independence for adults after orthopaedic procedures.

Georgia is passionate about stroke and neurological rehabilitation, helping older adults maintain independence, and supporting children to develop essential motor and social skills. One of her notable achievements includes collaboratively developing a new technique with a client to regain hand function, empowering them to achieve meaningful daily tasks after decades of limitation.

Special Interest Areas

- Stroke and neurological rehabilitation
- Hands and upper-limb rehabilitation
- Paediatric fine and gross motor function
- Supporting older adults to maintain independence and quality of life
